

Facilitator: Jonathan Köre

Participants: Gustaf Spjut, Jonathan Köre, Benjamin Vinnerholt, Filip Andréasson, Gustav Häger

Date: 2018-09-14

1 Meeting Agenda

Group meeting for Basta.Gruppen.LTD, group ID: 19.

2 Objectives (5 min)

Discuss what we need to ask Mazdak on the upcoming meeting.

Discuss when to start programming.

Discuss paper prototyping.

Discuss what to do for/during next week. Deadlines etc.

Discuss what to name the application.

3 Reports (15 min) from previous meeting

The user stories that we will have in this sprint have been moved to this sprints backlog. In addition they have also been ranked.

The RAD has been started but still needs some additional work.

The user stories (for the upcoming sprint) have been completed by Benjamin, Gustav and Jonathan.

The domain model has been started but still needs some additional work.

Travis has been activated to work on the Github repository.

The paper-prototype has been started but still needs some additional work.

4 Discussion items (35 min)

- **What to ask Mazdak**

Ask Mazdak about RAD. New document per sprint or continuous work on one document?

Ask about what Functional/non-functional means on the RAD document.

Ask Mazdak about the UML for the domain model. Is our domain model properly modelled? Do we need to add or remove items from it? Is it supposed to only cover the current sprint?

How extensive is the paper prototype supposed to be?

- **Discuss when to start programming**

We should start once we finish our UML domain diagram. And a design document should preferably be created first, so the group members know the structure of the program. The group will aim towards having this done on monday.

Facilitator: Jonathan Köre

Participants: Gustaf Spjut, Jonathan Köre, Benjamin Vinnerholt, Filip Andréasson, Gustav Häger

Date: 2018-09-14

- **Discuss paper prototyping**

The paper prototype will be completed after the meeting with Mazdak since we do not know how much we are supposed to model.

- **What to do during next week**

We have a seminar 15:55 in ES51 on wednesday. Where we will show our domain model.

Our first prototype needs to be done by thursday since that is when we will have next weeks meeting with Mazdak.

5 Outcomes and assignments (5 min)

Ask Mazdak a series of questions. After that we should hopefully have more clarity on how to continue with UML diagram, RAD document, and paper prototype.

6 Wrap up

Next meeting to be held on monday, 17/9, 1500-1900 hrs.
