

Facilitator: Benjamin Vinnerholt

Participants: Gustaf Spjut, Jonathan Köre, Benjamin Vinnerholt, Gustav Häger

Date: 2018-09-06

1 Meeting Agenda

Group meeting for Basta-Gruppen_LTD, group ID: 19. Filip is sick and can therefore not participate.

2 Objectives (5 min)

Trello

User Stories

GitHub

Maven/Gradle

Functionality within the application

3 Reports (15 min) from previous meeting

We have decided to create a chatting application for desktops.

We have yet to set up a GitHub, since there was no time during the workshop.

4 Discussion items (35 min)

- **Trello**

We need to configure our Trello board in accordance with the guidelines which we have been provided with. i.e. make different steps in the process so that we can track our progress on different user stories.

- **User Stories**

In order to start with our User Stories we need to start creating a project backlog.

- **GitHub**

We need to create a Git repository and connect everybody to it. We haven't done it yet since there was no time for it during the workshop.

- **Maven/Gradle**

We do not know whether or not we really need to use these tools, therefore we need to ask our supervisor(?) tomorrow. It seems that Maven is very hard to use, and we are therefore leaning towards Gradle. Since we haven't gotten an explanation as to why we need to use these tools we feel conflicted.

- **Functionality within the application**

We want to create a chatting application for the desktop. The main priority should lie in basic functionality such as just sending a message from one computer to another. After basic functionality has been achieved further features can be added. Such as: Creating profiles, adding profile pictures,

sending pictures, sending emotes and creating group chats. The possibility for expansion is endless.

5 Outcomes and assignments (5 min)

Ask supervisor about Gradle/Maven to get some clarity in the issue.

Ask supervisor about GitHub.

Look into Trello Design

Come up with a backlog and User Stories

Everybody present at the meeting will look into trello.

6 Wrap up

Unresolved issues:

GitHub, Maven/Gradle, project backlog and User Stories

Next meeting will be on monday 10/9 at 15:15
