

Facilitator: Jonathan Köre
Participants: Gustav Häger, Benjamin Vinnerholt, Gustaf Spjut, Jonathan Köre, Filip Andréasson
Date: 2018-10-05

1 Meeting Agenda

Group meeting for Basta_Gruppen_LTD, group ID: 19.

2 Objectives (5 min)

Discuss the new sprint.
Discuss the current state of the SDD.
Discuss cleaning up the code / review.

3 Reports (15 min) from previous meeting

Gustav, Jonathan and Benjamin have started with the SDD, but are unsure of how to continue. Gustav has started with the JsonHandler and the basic functionality has been implemented, however more methods need to be implemented. Jonathan has worked on making the JsonHandler work with the rest of the program.

Benjamin has been working on creating a user settings page where the user can edit their credentials and change picture and password. Gustaf have fixed tests somewhat, added a failed test and, together with Jonathan, solved a big merge.

4 Discussion items (35 min)

- **The new sprint**
The old sprint got a bit drawn out, but is almost done. A few new user stories will be picked in Trello.
- **The current state of the SDD**
We need to ask Mazdak about what sequence diagrams are of interest. We also need to ask how to split up our view and controller in the SDD since they are so intertwined. We need to ask about the sequence diagrams and what functionality we should display.
- **Cleaning up the code**
A small code review will be conducted as well as a code cleanup where we remove unnecessary code and protect more fields that are too public at the moment. We might look into Java coco to get help in seeing what code is not currently being used in our program.

5 Outcomes and assignments (5 min)

Gustav will finish the JsonHandler so that all methods that it is supposed to have will be implemented properly, Gustav and Gustaf will then write tests

Facilitator: Jonathan Köre
Participants: Gustav Häger, Benjamin Vinnerholt, Gustaf Spjut, Jonathan Köre, Filip Andréasson
Date: 2018-10-05

for the JsonHandler. Jonathan and Gustav will work on the cleanup project. Gustaf will be responsible for the set status user story. Filip will implement group conversations and look into creating sequence diagrams.

6 Wrap up

Next meeting will be on Tuesday (9/10) 9:30 in M1203C.
