

Facilitator: Filip Andréasson
Participants: Gustav Häger, Benjamin Vinnerholt, Gustaf Spjut, Jonathan Köre, Filip Andréasson
Date: 2018-09-17

1 Meeting Agenda

Group meeting for Basta.Gruppen.LTD, group ID: 19.

2 Objectives (5 min)

- Prepare for seminar - Programming: who does what? - User stories needs to be completed: who will finish them? - RAD: who will finish it? - Design document: who will start with it?

3 Reports (15 min) from previous meeting

- Jonathan has added a gitignore file. This file was generated using gitignore.io with the tags Gradle, Java and IntelliJ. Hopefully the document should now cover everything we need. - Filip has booked rooms and meetings for this week. - Gustav has looked into embedded databases and the best choice seems to be using a json-file with Gson. This will however be decided at a later date. - Together, the group has completed a UML diagram for the domain model. The model holds up for now, but will need new additions in later iterations.

4 Discussion items (35 min)

- **Prepare for seminar**
A powerpoint presentation needs to be prepared, which will contain our domain model and a short presentation of our application. We will need to rehearse once we have prepared our short presentation tomorrow (18/9). The entire group will work on the presentation.
- **Programming: who does what**
Jonathan, Benjamin and Gustav will start programming. They will create a base for the program, a very basic GUI and they will finish the user stories that are in the current sprint.
- **User stories needs to be completed: who will finish them?**
We need to write tasks and acceptance criteria for the User stories that are in the user story backlog. Filip and Gustaf will write these.
- **RAD: who will finish it?**
User stories, UML and paper prototype sketch to be added. Filip and Gustaf will work with this.
- **Design document: who will start with it?**
Benjamin, Jonathan and Gustav will work on creating this while they are programming.

Facilitator: Filip Andréasson

Participants: Gustav Häger, Benjamin Vinnerholt, Gustaf Spjut, Jonathan Köre, Filip Andréasson

Date: 2018-09-17

5 Outcomes and assignments (5 min)

Benjamin, Jonathan and Gustav will program and create a design document.
Filip and Gustaf will finish the remainder of the user stories as well as the RAD.

6 Wrap up

Next meeting will be at 9:30 on tuesday (18/9) in M1215B.
