

Facilitator: Gustaf Spjut
Participants: Gustav Häger, Benjamin Vinnerholt, Gustaf Spjut, Jonathan Köre, Filip Andréasson
Date: 2018-10-1

1 Meeting Agenda

Group meeting for Basta-Gruppen-LTD, group ID: 19.

2 Objectives (5 min)

Discuss new sprint backlog
Do we want to add more User Stories?
Problems with the code?

3 Reports (15 min) from previous meeting

Gustaf has worked on showing contactlist in the model. Made iterators in the model that gets returned to the view instead of sending arrays. Assisted a bit with UML diagram.

Gustav has started work on the SDD and is at the moment trying to implement a database using Gson and Json. The SDD progress has halted since there is a question that needs to be answered in order to continue. Gustav has emailed Mazdak about this. It is now possible to save users to a Json file using Gson, and more features will be implemented shortly. After the class is done it will be implemented in the model.

Jonathan has worked on implementing observer pattern into the program, as well as a few smaller fixes on the current sprint user stories.

Filip has worked on being able to create new conversations and being able to see conversations and contacts separately in two different tabs. This meant creating multiple FXML files and adding functionality for these files. Filip also booked group rooms and meetings for this week.

Benjamin has worked on implementing a User Settings-page, where the user can edit their credentials, as well as changing password and profile picture.

4 Discussion items (35 min)

- **Discuss new sprint backlog**
We need to complete the testing, database, finish observables and do more foundational work before starting with new user stories. We will therefore postpone the end of the current sprint before starting the next one.
We also need to preform a code review before we start with new User Stories.
- **Do we want to add more US?** Pending sprint finish.

Facilitator: Gustaf Spjut
Participants: Gustav Häger, Benjamin Vinnerholt, Gustaf Spjut, Jonathan
Köre, Filip Andréasson
Date: 2018-10-1

- **Problems with the code?** Not at this time.

5 Outcomes and assignments (5 min)

Finish last user stories, after which we will do code review. Gustaf will start with code review. Gustav will continue the work on Gson and Json as well as the SDD. He will then join the code review.

6 Wrap up

Next meeting will be at on Thursday (4/10) in M1203D.
